

The Hood River Glacier.

VOL. XXVI

HOOD RIVER, OREGON, THURSDAY, NOVEMBER 5, 1914

No. 23

"Time never laughs at those who save money, - he knows the sorrows of too many who didn't."

The best way to teach children to save is to set an example yourself by starting a Bank account.

Then if you start accounts for them and teach them the habit of saving you will be doubly rewarded by the comfort they will bring you in the future. Moulding your children's habits early in life in regard to saving, fortifies them against extravagance, the destroyer of usefulness. One dollar will open an account.

4% Interest Paid on Savings

Capital \$100,000 Surplus \$35,000

Questions for You

There are many questions confronting you every day. One of the most important is WHERE you will have your bank account.

If you haven't already solved the problem, permit us to offer you the services of this bank, the matter of being associated with a growing, modern bank, is important. We offer you every convenience and assurance and want you with us. Come and settle the question of WHERE you will do your banking. We are glad to extend you the invitation.

Hood River State Bank

The Board of Directors of the Hood River Creamery Company

Announce that the new creamery is now completed and will positively begin operation

Tuesday, Nov. 10th, 1914

All shippers of cream are requested to notify Mr. F.W. Bluhm, superintendent, the amount of cream they expect to deliver.

Mr. Bluhm will be pleased to furnish all information regarding all such deliveries, and he will also take great pleasure in showing the plant to those interested in this enterprise and explaining its operation. Telephone 3991.

Thought About That Hot Water Bottle?

You know there's nothing better for warming a cold bed during those cold nights or for allaying suffering of neuralgia, toothache or other pain. Before you buy let us show you our heavy gauged handsomely embossed

Maximum Hot Water Bottles

Each bottle speaks satisfaction at first glance and we give you a two-year guarantee certificate with each bottle. This cold weather comfort will withstand hard usage; will not leak nor grow hard. Made of the finest rubber, of a rich chocolate color. Each Maximum Water bottle has the same quality features; reinforced seams, full capacity, unobtainable stopper.

Price: 2 quart \$1.75; 3 quart \$2.25
Guaranteed for two years. Isn't this really economy?

We buy in connection with over 5,000 other Rexall stores; we get a generous discount; you get the benefit. Maximum Water bottles are sold in this community only by the

Kresse Drug Company
The Rexall Store

FOR SALE

Are you looking for a few acres of Columbia River land? I can sell you 16 acres, about 10 acres in alfalfa, near station and boat landing. This is very early land. Strawberries will soon pay for the land as you get the benefit of the top market. You can have an income the first year.

Inquire of F. W. Dehart, Hood, Wash.

Satisfactory Titles

are demanded by the wise buyer. Our work is unquestioned and guarantees protection.

Satisfactory Insurance

is deemed a necessity by the wise property owner. We represent 10 strong companies and have millions of insurance in the Valley.

Satisfactory Bonds

may sometime be required of you, contract, court or security. When in need of such service inquire of us.

PEOPLE WILL TRY NEW SIRUP

EXPERT MAKES CIDER PRODUCT

Demonstrators Will Visit Homes and Distribute Receipts—Drug Obtained in Process of Manufacture

H. C. Gore, the United States Department of Agriculture expert, who is here making tests of apple cider sirup and cider concentrated by a centrifugal process and who is assisted in his work by Earl M. Noble and H. T. Regnell, has made a quantity of the sirup, which the local housekeepers will be given an opportunity to try out. The new product, which has been tried successfully by the family of C. J. Giddings, of the Hood River Apple Vinegar Co. and which has been tried by government cooking experts, will be distributed through the city, and lady demonstrators will probably visit the homes with receipts and show how to use the new sweet.

The Weekly News Letter of the Department of Agriculture describes the process as follows:

Following extensive experiments begun last spring, the head of the fruit and vegetable utilization laboratory of the department has applied for a public service patent covering the making of a new form of table sirup from apple juice. This patent will make the discovery, which the specialists believe will be of great value to all apple growers as a means of utilizing their culls and excess apples, common property of any cider mill in the United States which wishes to manufacture and sell apple cider sirup.

The new sirup, one gallon of which is made from seven gallons of ordinary cider, is a clear ruby or amber colored sirup of about the consistency of cane sirup and maple sirup. Properly sterilized and put in sealed tins or bottles, it will keep indefinitely, and when opened will keep under household conditions as long as the ordinary sirup. It has a distinct fruity aroma and special flavor of its own which is described as being practically the same as the taste of the sirup substance which exudes from a baked apple.

The sirup can be used like maple or other sirups from griddle cakes, cereals, household cooking and as flavoring in desserts. The government cooking experts are at present experimenting with it in cooking and expect shortly to issue recipes for use of the new sirup in old ways and for taking advantage of its special flavor in novel dishes.

The interest of apple growers in the product arises from the fact that the new apple cider sirup promises to give them a commercial outlet for vast quantities of windfall and other apples for which they hitherto could find no market, either in perishable raw cider or in vinegar. Cider production, it seems, comes largely at one season of the year during which the market is more or less flooded with this perishable product. The bulk and perishability of the raw cider, moreover, the cider makers state, often make it unprofitable for them to ship the raw cider of one district long distances to a non-apple growing region. The market for cider, therefore, has been largely restricted in many cases to localities near the area of production. No method of sterilizing ordinary cider has been found practical for the reason that the mere number of once interferes with its delicate flavor.

With the cider mill able to make a palatable, long keeping table sirup out of its apple juice, growers, it is believed, will be able to use all excess juice for bottled or canned apple sirup. The new sirup, the specialists find, will keep indefinitely, so that the cider makers can market it gradually throughout the year.

The process for making the sirup calls for the addition to a cider mill of a filter press and open kettles or some other concentrating apparatus. The process is described as follows: The raw cider is treated with lime milk of lime until nearly but not quite all of the natural malic acids are neutralized. The cider is then heated to boiling and filtered through a filter press, an essential feature of the process. The resultant liquid is then evaporated either in continuous evaporators or open kettles, just as ordinary cane or sorghum sirup is treated. It is then cooled and allowed to stand for a short time, which causes the lime and acids to form small crystals of calcium malate. The sirup is then refiltered through the filter press, which removes the crystals of calcium malate and leaves the sirup with practically the same basic composition as ordinary cane sirup. Its flavor, however, and appearance are distinctive.

Calcium malate, the by-product, is a substance used in medicine and at present selling for \$2 per pound. It is believed that if calcium malate can be produced in this way cheaply and in large quantities, it can be made commercially useful in new ways, possibly in the manufacture of baking powder.

CLUB CABARET BANQUET SUCCESS

The cabaret-cafe banquets of the Commercial Club at the club rooms Monday evening was, to put it lightly, the success of the season. But it was more than that; for the 185 men participating have never had a better time. Content, with an inner glow, they produced laughter better than medicine for indigestion. If many more such dinners were served, Hood River men would all resemble the round punched little men who gave Rip Van Winkle too much to drink.

The diners were served to fried chicken, pumpkin pie, fruit salad and other dainties, built as only skilled culinary architects know how, in cafeteria style. The clubmen then seated themselves around the big assembly room, cabaret fashion. The tables seated just 100. When the first 100 men had eaten their fill and listened to the clever stunts, they repaired to the billiard and reading rooms, while the 85 others filed in and found seats around the cabaret tables.

Most people of Hood River have now heard Geo. M. Hyland make a speech. Mr. Hyland is known from Seattle to

San Diego as one of the best after dinner speakers that ever entertained a group of banqueters. He was at his best Monday night, when he opened up with his dry wit and interspersed among his jokes and stories, information of an exceedingly interesting nature concerning the San Francisco exposition. Mr. Hyland is a member of the Oregon Fair Commission.

And local talent was there with the goods. The old time favorites, Clarence F. Gilbert and Arthur Clarke, appeared on the scene. Mr. Gilbert was dressed as a Dutch maiden. The European war apparently did not worry her. And the audience forgot the harrowing tales from the battle lines. Mr. Clarke was a gallant Dutchman. The usual rotundity of the gentlemen was increased and their very waddle was ludicrous.

The stunt of Stewart Kimball and A.W. Peters brought howls of laughter and applause. Mr. Kimball was made up as a "chicken," while Mr. Peters was the dashing young sport keen for conquest.

J. M. Culbertson will be known hereafter in Hood River as "Topsy" Culbertson. He recalled incidents of his former residence in Texas and handed out coin talk to the white gemmen.

John Goldsberry has evidently had the pine squirrels and chipmunks in the vicinity of "G.W. and G.W. Ranch" on China Hill wondering just what possessed him, while he practiced Chinese songs and swear words. But his rehearsals made his Chinese stunts worth many laughs. A stranger would not have known him from old Li Hung Chang, himself.

The evening was enlivened by the Apple Valley's sweet singers. "Dad" Epping strolled between the rows of tables and in his care free manner brought a hush as he sang some of the sweetest of ballads.

O. T. Wedemeyer, with his deep rich voice, causing a hush to fall over the banqueters, sang of his favorite songs to the pleasure of those who listened. The Kitchen Quartet, composed of Carl Vaughan, R. F. Marquis, Louis A. Henderson and Estee Bronius, dispensed pleasing melody. All were dressed as chefs.

At 11 o'clock the entire assemblage attended a picture show at the Electric Theatre. The pictures, showing scenes of the California fair and bits of the wonderful California country, were especially interesting.

The success of the banquet was due to the hard work of Secretary Ravlin, who supervised, personally, the preparations and service.

Hans Hoerlein accompanied the singers. Not soon will the guests forget the announcements made by Butler Chas. N. Clarke. J. H. Heilbrunner was a handsome old Dutch Uncle. The committee in charge of the affair was composed of C. H. Vaughan, C. F. Gilbert, Art Clarke, Harold Herschner, J. M. Culbertson, Frank Davenport, Jr., Ed Winter and K. W. Sinclair.

CREAMERY WILL BE READY NOVEMBER 10

On account of delay in receiving a cream ripener, the Hood River creamery will not be able to start operation this week as has been expected. However, the new institution will be ready and will begin the manufacture of butter next Tuesday. F. W. Bluhm, superintendent of the creamery, will be constantly in attendance and will be glad to escort visitors through the plant. Those who have signed up to furnish cream and prospective patrons are urged to call Mr. Bluhm and notify him of the amount each will have. The telephone number of the creamery, which as yet does not appear in the directory, is 3991.

Clarence E. Coffin, secretary of the cooperative organization, will be at the creamery every Saturday afternoon, where he will be glad to advise with patrons as to the purchase of cows or any other matter that may confront them. When not in the city he may be reached by telephone at his home on the East Side.

100 GIFT CARS TO BELGIANS SUGGESTED

A suggestion that has created no small amount of interest since it has been made by E. N. Benson, a West Side orchardist, proposes that the Apple Growers Association send to the war stricken people of Belgium 100 gift cars of apples. Mr. Benson was in the city Monday afternoon and made the proposal to A. W. Stone. Mr. Stone was not in a position to give any answer, as many things will have to be taken into consideration. The railway companies will have to be asked to cooperate, as will steamship companies. The total Hood River crop this year will be approximately 1,300 cars.

Many who have considered the big gift, which will form about two trainloads of apples, are growing enthusiastic over the possibilities. When asked about the proposed gift Tuesday Mr. Stone said he didn't think it was in his province to make any decision. "It will be all right for the Association to give a car of fruit," he said. "If public sentiment favors a large gift, I will call it to the attention of the board of directors, the members of which I assume will ultimately put it up to the growers, themselves."

Mr. Benson says that the proposed big gift was called to his attention by Portland people owning local orchards. "S. M. Mears and R. R. Hoge are favorable to such a plan," he says. "I am going to continue to branch it to the people. I hoped to see the bankers this city Tuesday, but it was a holiday."

MT. HOOD R. R. CO. CUTS APPLE RATES

The Mount Hood Railroad Co. has issued a statement that it will make heavy reductions in tariffs on low grade apples. The reduced freight charges, which have been called forth on account of the depression in the apple market, will aid the growers in the disposition of their crop product. They will be effective to January 1, 1915.

Many low grade apples are shipped over the valley railroad, and the new rate will enable the growers in the Upper Valley and along the route to ship their fruit to the cider mill and evaporating plant in the city.

RETURNS ARE VERY SLOW

WITHYCOMBE WINS BY A BIG VOTE

Chamberlain Has Small Margin—Republican County Nominees All Elected—Several Contests Close

The heaviest vote in the history of the state was cast at Tuesday's election. Women in all parts of the state showed an intense interest. The Hood River county vote was heavy, especially in the city precincts. At the East Hood River voting place in the basement of the Eliot building it was necessary to construct additional booths to accommodate the voters. Women served on the election boards in nearly all districts, working at the recount at some polling places all the night and until on toward night yesterday.

The recount has been slow the state over. While the complete returns are not in Withycombe has a lead of 25,000 votes. Chamberlain seems to be elected, but by a very small margin. Hood River county gave a large majority for the Prohibition amendment. The state as a whole will go prohibition by at least 10,000 votes. The universal eight hour law was snowed under, and the \$1,500 exemption bill was defeated.

The local bill to decrease the salaries of the county officers carried by a heavy majority.

N. J. Sinnott has been elected to congress by a large vote. However, his vote in Hood River county was materially decreased on account of support for Geo. L. Cleaver, Prohibition nominee. Mr. Cleaver carried both Heights precincts.

All regular Republican nominees for local county offices seem to be elected. The race of assessor will be close. Heppner ran a good race in several rural precincts, but Wickham more than made up for the loss in the city. The race for coroner was keen. Dr. Abraham being close behind Dr. Dumble, leading in several precincts.

OFFICERS CAPTURE ESCAPED CONVICT

When Archie F. Leonard, of Portland, who is doing detective work for the sheriff's office here, assisted the local officers in making the arrest Saturday night of a man who gave his name as Frank W. Turner and who was wanted on a charge of having passed bogus checks on local merchants in 1912, he identified the fellow as Frank W. Rollins, who escaped in 1908 from the Walla Walla, Wash., penitentiary and for whom he has been looking since that time. Turner, who was committed from Yakima county in 1908 on a charge of forgery, was doing a sentence of from one to 14 years. Since his capture it is learned that he was sentenced in 1910 to Kelly's Butte on a charge of forgery in Portland. He was given conditional pardon by Governor West after serving 10 months.

Turner, who is known to the police as Frank W. Davis, alias Frank Hastings, alias McDowan, alias Ferguson, was working at the time of his capture for the Shively & Driscoll.

He secured their check from the office at noon one day. He returned last week and applied for work at the same place. He was recognized, and the officers were notified. The authorities of the Washington prison have been notified and will come here for the man of many aliases.

The checks which caused the man's last capture, were passed in January, 1912, on the Paris Fair, F. A. Cram, the Boyce restaurant and the Graham restaurant. Detective Leonard made the identification from a scrap of paper torn from an old circular. When he first confronted Turner, alias Rollins, with his information, the latter stoutly denied that he was ever imprisoned at Walla Walla. But finally on Sunday afternoon in the presence of Mr. Leonard, Sheriff Johnson and Marshal Carson, he made a full confession.

Mr. Leonard feels especially jubilant over the capture. The man has had a varied and checkered career. He is a skilled mechanic and has no trouble in getting a job. After he was pardoned from Kelly's Butte he stole numerous articles from his roommate, Bert Allen. This was confessed Sunday night, when Allen arrived from Portland to work for L. V. Driscoll in the latter's blacksmith shop.

CANDIDATES FAIL TO ADDRESS LOCAL FOLK

In all the state of Oregon Hood River county during the past campaign was freer from the usual excitement attendant on a political campaign than any other part of the state. Except for the two meetings addressed by Dr. C. J. Smith Monday, no other gatherings were held for the purpose of listening to campaign speeches. However, the citizens have assembled on numerous occasions to discuss the initiative bills on the ballot.

At a meeting of Mr. Smith here at the Heilbroner hall about 60 voters were present, number of them women. About 50 attended the Parkdale meeting Monday night. Dr. Smith, accompanied by J. H. Hazlett and James W. Pifer, returned to Hood River Monday night after the Pifer speech. They did not reach the city until about two o'clock.

Children Give Dry Parade

The rain came down in torrents, but it failed to daunt the women, children and a good crowd of ministers who participated in the "dry parade" of last Saturday afternoon. Captained by members of the Women's Christian Temperance Union and the ministers, the tiny paraders cheered lustily as they waved flags and banners. Drawing up in a circle at the corner of Oak and Second streets they sang under the leadership of Dr. W. S. Nichol, "Oregon is Going Dry."

For Rent—An apartment in new Telephone building. Call at the telephone office.
